

Layla Rodas

Backend Developer | Python, APIs, Automation & Integrations

Palma de Mallorca, Spain · rodas.layla@gmail.com · +34 637 09 97 15 · github.com/laylarodas · linkedin.com/in/laylarodas · layla-portfolio-zeta.vercel.app

PROFESSIONAL SUMMARY

Backend developer and Multiplatform Application Development graduate with hands-on experience in automation, ERP integrations, document processing and APIs. Worked with Python, PHP, Java, SQL, Playwright and OCR to build solutions for business workflows and authenticated systems.

EXPERIENCE

Backend & ERP Integration Developer

Mar 2026 – Jun 2026

EBAL IT — Palma de Mallorca · Professional internship

- Developed and improved an accounting integration between Dolibarr and A3, implementing invoice transformation, validation and normalization, tax rules, credit-note handling, duplicate controls and re-export support.
- Built a supplier-invoice processing pipeline with Python, OCR and structured extraction, including JSON validation, IMAP integration, idempotency, traceability and business rules.
- Worked with PHP, Python, SQL, Dolibarr and ERP workflows to automate accounting and document-processing operations.

Python Automation Developer

Jun 2026 – Present

Freelance client — Upwork

- Developed a Python automation solution for an authenticated web application, combining Playwright, session management and real-time event monitoring.
- Integrated authenticated web workflows with REST APIs, JWT tokens, WebSockets, structured logging, alerts and duplicate-execution controls.

Software Developer

Sep 2022 – Sep 2025

Rovedra SL

- Designed, developed and maintained the company’s responsive corporate website using React, Vite and Tailwind CSS.
- Built reusable components, improved performance and usability, and worked with business stakeholders to translate requirements into digital features.

SELECTED PROJECTS

Spring Boot REST API

github.com/laylarodas/notes-api-springboot

- Designed and built a REST API using Java and Spring Boot, Controller–Service–Repository architecture and MySQL CRUD operations with JPA/Hibernate.
- Applied DTOs, validation, global exception handling, Postman testing and Git version control.

TECHNICAL SKILLS

Backend	Python, Java, PHP, Spring Boot, REST APIs, Playwright
Data & integration	SQL, MySQL, JSON, ERP integrations, Dolibarr, IMAP, OCR
Architecture & security	Layered architecture, DTOs, validation, exception handling, JWT, HMAC, idempotency
Tools	Git, GitHub, Docker, Postman, Maven

EDUCATION

Higher Technician in Multiplatform Application Development

2026

DIGITECH FP — Completed in 2026. Spanish higher vocational qualification covering backend development, Java, databases, data access, services, concurrent programming, Android, interfaces and cybersecurity.

Full Stack Web Development

2020 – 2021

Digital House — Node.js, Express, React, SQL

CERTIFICATIONS & LANGUAGES

- Java Programming — Duke University, Coursera
- AWS Developer Associate — in progress

Languages: Spanish (native) · English (B2)
